SUMMARY OF INFORMATION

Land, little structures, pathways, and a small body of water are present. It is rainy and muddy here. It is a little base or community. Workers are in camouflage (boots and hard hats). They are marching. One of the structures has long vertical cylindrical portions which emit smoke. Fire (flames) are on the inside of this structure. This is a processing factory or plant. There is an explosive reaction of something that is being processed. Hard metals are present. The emphasis here is on physical performance. This is what countries would do if they do not have enough money. There is a religious order located to the right of this site.
